DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3 – 18, 20, 23 – 27, 30 - 33 are rejected under 35 U.S.C. 102(e) as being anticipated by Jain et al (U.S. 6,144,375).

♦ As per claims 1, 8, 17, 20, 27,

Jain discloses a method for browsing a moving picture comprising:

- “Receiving moving picture information and multiple supplementary information”

See Fig. 4, Col. 16 line 25 – 47, Jain, where “moving picture information” corresponds to “live video information” coming to the capture/filter 304 (col. 16 line 37 – 41). “Multiple supplementary information” corresponds to “statistical information streams associated with the media event” or other information specific to the event (col. 16, line 41 – 45). The “statistical information” corresponds to the “real information”, and “other information about the event” is corresponding to the “content information”.

- “Separating the moving picture information and the multiple supplementary information” See Fig. 6B, where the video server 350 contains data about video

clips, and the web server 352 contains statistical or other information about the video clips.

- "Displaying the moving picture information" See Fig. 7, col. 22 line 6 – 15.
- "Browsing/searching supplementary information related to a particular object from the multiple supplementary information" See Fig. 9, col. 30 line 43 – 47, where the user try to search for information about a particular player in a football game.
- "Displaying the supplementary information when a user requests for browsing/searching the supplementary information related to the particular object" (See Fig. 9, elements 508, 510, col. 30 line 48 – 61).
- "Content information is information on a place or an object having meaning in view of content of the moving picture" See Fig. 9 element 510, col. 4 lines 21 – 24, col. 30 line 57 – 61.
- "Real information is information on a real place or a real object which is a meaningful place in view of the content of the moving picture" See Fig. 9 elements 502, 508, col. 30 line 49 – 51. The "real information" corresponds to the "real name" of the object or player.

♦ As per claims 15 – 16, 18, Jain discloses:

- "Content information is information on a place or an object having meaning in view of content of the moving picture" See Fig. 9 element 510, col. 30 line 57 – 61.

- "Real information is information on a real place or a real object which is a meaningful place in view of the content of the moving picture" See Fig. 9 elements 502, 508, col. 30 line 49 – 51.

◆ As per claims 3, 9, Jain discloses:

- " The content information and the real information includes selective combinations of object information, event information, place information, and object/event/place in a graph" See Fig. 3, 4 and fig. 6A, where object information is the video stream 316 (fig. 4) coming to the capture/filter or from the sensors 206 in Fig. 2, event information is the supplementary data stored in the database 216, 218 in fig. 3, col. 13 line 27 - 48. The text stored in the database also specifies the place information.

◆ As per claims 4, 10, Jain discloses:

- " The content information and real information includes text information describing character of the object, and image or graphic information on the character" See Fig.9, where the element 501 is the image of the character selected by user, and the text in 508, 510, describes the character of the object.

◆ As per claims 5, 11, Jain discloses:

- " The object information includes text information, and an image" See Fig. 9, element 504, 510.

◆ As per claims 6, 12, Jain discloses:

- "The event information includes text information describing content of the event, and information on a place or a sketch map the event occurred" See Fig. 5, 6a,

where the text information can be entered by user 320, and the time clock from the start crew computer also specifies a map the event occurred.

♦ As per claims 7, 13, 24, 31, Jain discloses:

- "The place information includes text information describing the place, and information on location" See col. 30 line 58 – 61.

♦ As per claim 14, Jain discloses:

Claim 14 is rejected based on the rejection of claim 1, 19, and 3.

♦ As per claims 23, 25, 30, 32, Jain discloses:

- "The person is at least one of a person whose image is captured" see fig. 9 element 501.

♦ As per claims 26, 33, Jain discloses:

As noted above, the system can include audio information (col. 16 line 34 – 42), this audio is considered as a "natural sound" associated with the video clips.

Response to Arguments

1. Applicant's arguments filed 07/07/2003 have been fully considered but they are not persuasive.
2. Applicant argues that Jain's reference fails to disclose "real information" as claimed in the independent claims. Examiner disagreed.

Referring to Fig. 9, col. 30 lines 49 – 50, col. 4 lines 21 – 24, clearly, the reference disclosed "real information" about the player corresponds to "name" of the player, or the "location and environment in which the video event occurs" also is the "real information".

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
